

SUMMARY

Dual Degree student with hands-on experience across Python, Flask, Playwright n8n automation, and multiple domain-focused projects including IoT, cybersecurity, travel-tech, quantum computing, and agriculture. Adept at building practical solutions, optimizing workflows, and developing clean, scalable systems. Known for fast learning, cross-domain adaptability, and turning complex ideas into functional prototypes. Seeking opportunities where technical depth and creativity can drive meaningful impact.

EDUCATION

Indian Institute of Technolog. Madras

Bachelor of Science - BS in Data science
2024-2028

Gayatri Vidya Parishad College

Bachelor of Technology - BTech in Computer Science
2023-2027

Sri Chaitanya Junior College

Intermediate in MPC
2021-2023

St John's Parish School

Class X in iCSE
2008-2021

SKILLS

- Python, Java, Flask (API development)
- TensorFlow (model building & optimization)
- RPA Automation & n8n Workflow Automation
- NFC Systems (Reading/Writing, Secure Token-Based Access)
- Linux (Ubuntu), Git/GitHub
- Web Development (Full Stack and React.js)
- IoT Prototyping (Ultrasonic + Servo-Based Scanning)

PROFESSIONAL EXPERIENCE

BrainyMed Solutions

RPA Systems & Testing | Sept 2025- Dec 2025

- Built bots that record workflows like extract data, read files, move information between systems, trigger workflows, & make decisions using defined rules and replay using time triggers.
- Reduced human workload and processing time while increasing accuracy
- Tested, debugged, and optimized your workflows by 60 % to make sure the bots behaved better than real employees.

Student Intern

LanguifyAI, Amaravati, Andhra Pradesh | July 2023 - Nov 2023

- Established and maintained a good rapport and a positive demeanor with employees and customers.
- Attended meetings and documented meeting content, outcomes, and action items.
- Built relationships with customers by providing exceptional customer service experience.

Freelance Programmer

Freelancer | 2024- Present

- Utilized version control systems like Git and GitHub for source code management.
- Ensured compliance with industry standards during development process.
- Designed database schemas to support application features while ensuring data integrity.
- Monitored system performance metrics and made necessary adjustments when needed.

CERTIFICATIONS

- IBM – PY0101EN: Python Basics for Data Science
- IBM – DA0101EN: Analyzing Data with Python
- IBM – DB0111EN: Introduction to SQL
- IBM – CC0101EN: Introduction to Cloud Computing
- IBM – AI0331EN: Developing Generative AI Applications with Python
- IBM – GPXX0BSLENV2: Guided Project – Deploy a Serverless App on IBM Code Engine
- Google – WebML101: Google AI for Anyone (edX Verified Certificate)
- CurtinX – IOT1x: Introduction to the Internet of Things (IoT)
- Raspberry Pi Foundation – RFPF101: Programming 101 – An Introduction to Python for Educators
- StanfordOnline – SOE-YEEQMSE01: Quantum Mechanics for Scientists and Engineers 1
- UC3Mx – IT.1.3x: Introduction to Java Programming – Fundamental Data Structures and Algorithms
- ArmEducationX – ML101: Introduction to Machine Learning
- Raspberry Pi Foundation – RPFML-AI: Introduction to Machine Learning and AI
- IBM – GPXX0BSLENV2: Deploy a Serverless App on IBM Code Engine

ACHIEVEMENTS

- 5-Star Coder on HackerRank
- Perplexity Student Ambassador
- 9x Hackathon Winner
- 3x Ideathon Winner
- Co-Founder– Novus Club
- Organized 24-hour inter-college hackathon
- Organized FIDE-rated international chess tournament

- Telugu – Native
- English – Fluent
- Hindi – Intermediate

PROJECTS

Hospital Management System(HMS)

Built a production-ready Hospital Management SaaS using Flask with complete multi-role access for admins, doctors, patients, lab, and pharmacy workflows. Integrated AI-based disease prediction, e-prescriptions, QR health cards, lab reports, and medical history management. Added secure authentication, RBAC, CSRF protection, audit logs, and payment support through Razorpay along with ABHA/Aarogyasri compatibility

Mantis-Automation-Studio

Developed Mantis, a custom RPA system using Playwright.js and Python capable of recording user workflows, replaying them on command, executing time-triggered automations, and handling tasks with built-in retries and fallback logic for reliable end-to-end process execution.

AI-PII-Detector

Engineered Flask web application with hybrid regex + spaCy NLP for detecting and masking PII across 5+ file formats; implemented batch processing, risk scoring, and compliance features (GDPR/DPDP/HIPAA) with full test coverage

HireHub

Developed full-stack job platform using Flask and SQLite with complete job posting, user management, and application tracking system; implemented responsive UI and backend persistence layer

face-recognition-alarm-system

Developed Python-based face recognition security system with web interface for real-time authentication and monitoring; integrated ML pipeline with HTML/JavaScript frontend
